DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 2, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 2, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are:

(claim 2) "forming the amorphous layer" selection of amorphous layer in claim 1 is not definite. [What happens where is the amorphous layer if poly is selected?]

(claim 11) "carrying out the ion implantation process" of claim 9. Further lacks antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 8, 9, 12, 13, 14, 15, 16, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Turner et al. (US Patent Number 5792700).

Art Unit: 2825

6. Turner et al. teach a method of producing a doped semiconductor substrate, comprising of doping a surface the substrate (col. 1 lines 56 – 62), depositing amorphous or polycrystalline silicon on the surface by LPCVD at 500 – 600 °C (col. 1 lines 63 – 64, col. 2 lines 38 – 44), performing a heat treatment at least 600 °C to produce an epitaxial layer of 20 to 40 nm and a buried doping (col. 1 line 65 – col. 2 line 7, & col. 2 lines 56 – 67).

7. Claims 2 to 7, 10, 17, and 18 are objected to as being dependent upon rejected claims, but would be allowable if rewritten in independent form.

Remarks

8. The examiner has reviewed prior art in light of applicant's comments and amendment, and finds it persuasive. However, the examiner has discovered new art, which reads on some of the claims.
